Akshay Attri

Product Designer specializing in SaaS platforms and user-centered design solutions

8288994401 akshayattri1@gmail.com Portfolio

PROFESSIONAL PROFILE

Creative and detail-oriented UI/UX Designer with 3+ years of experience designing engaging, user-centric digital products. Currently working as a Product Designer on a multi-million-dollar SaaS platform. Strong background in designing intuitive interfaces and scalable systems for both mobile and web applications. Focused on turning business goals into thoughtful, usable, and impactful design solutions.

EXPERIENCE

Softobiz Technologies Private Limited

July 2022 - June 2025

Product | UX Designer

- Designed product experiences for EasyWebinar, a major live webinar and CRM SaaS platform.
- Designed several high-impact modules including livestreaming (EasyCast), participant management, 2FA authentication, and more.
- Designed the whole liveroom application of EasyWebinar that helps hosts to go live with their audiences. The application is live.
- Developed and maintained a scalable design system, improving team productivity and interface consistency.
- Collaborated with cross-functional teams (PMs, developers, stakeholders) in an agile environment.

Softobiz Technologies Private Limited

July 2025 - Present

Product | UX Designer I

Promoted to lead the end-to-end design process of the EasyWebinar Dashboard and the AI features within it.

- Leading the end-to-end design process of the EasyWebinar product dashboard — from research and flows to final UI.
- Designing AI-powered features within the EasyWebinar dashboard, translating complex AI capabilities into simple, intuitive experiences.
- Partnering with PMs and developers to ship new dashboard modules while maintaining a consistent design system.

Omninos Solutions

Oct 2021 - February 2022

Intern Web Designer

I worked as an intern in Omninos Solutions. I worked on dummy projects and enhanced my skills in HTML, CSS and javascript under the guidance of senior web designers.

Design Systems

Creation • maintenance • and scalable UI libraries

Other

Mobile & Web Design • Accessibility • Agile Collaboration • Developer Handoff • Azure Devops • Team collaboration on Asana

Dev Skills

HTML5 • CSS3 • Bootstrap

AI Tools

Loveable • Claude • Relume • FigmaMake

PROJECTS

Easywebinar Liveroom Application

View

EasyWebinar is a multi-million-dollar SaaS platform that enables businesses to run live, automated, and hybrid webinars. As part of the core product, the Live Room Application is where hosts conduct webinars in real time, interact with attendees, and manage live engagement features like polls, chat, and offers. I led the end-to-end UX and UI design for the live room experience. Working closely with product managers, developers, and stakeholders, I helped transform a complex set of webinar controls into an intuitive, clean, and scalable interface.

Ask Luna Astrology mobile/Web App

The Ask Luna Super Admin Portal is a web-based dashboard designed to manage and monitor the backend operations of the Ask Luna astrology consultation platform. It allows administrators to oversee astrologer profiles, user accounts, appointments, revenue analytics, content (e.g. daily horoscopes), and app settings. I designed the entire dashboard experience from scratch, translating complex administrative tasks into a clear and user-friendly interface. The goal was to create a modular, scalable, and efficient control panel for non-technical admin users to manage both users and astrologers effortlessly.

Stackways – Multi-Cloud Web Hosting Platform

Stackways is a modern, multi-cloud hosting platform that allows users to deploy websites and applications on top cloud providers like DigitalOcean, Linode, Vultr, and UpCloud within minutes—without any technical

top cloud providers like DigitalOcean, Linode, Vultr, and UpCloud within minutes—without any technical expertise. The platform focuses on speed, simplicity, and a clean interface to empower both developers and non-technical users. As the UI/UX designer for this project, I led the design of the marketing website and platform UX. The primary goal was to communicate value clearly and convert visitors into active users while keeping the interface minimal, fast, and modern.

Load Bearing Wall Removal Pros – Client Website

View

Load Bearing Wall Pros is a U.S.-based construction company specializing in structural engineering and load-bearing wall removal. The goal was to design a clean, professional, and conversion-focused website to help homeowners understand their services, trust their expertise, and get in touch easily. I collaborated directly with the client to design the entire website layout, structure, and UI elements. I was responsible for ensuring a seamless experience across desktop and mobile, while clearly presenting technical information in a user-friendly format.

EDUCATION

LPU

Bachelors of Arts

CGPA-6.39

DAV Senior Secondary School, Chandigarh

12th Grade (Non Medical)

CGPA-6.5
